Summer 2020

## ENGINEERING ANSWERS through TESTING & ANALYSIS

In this business you have to get your hands dirty. From the test lab to ocean oil platforms, underground mines, and everywhere in between - we collect, analyze and interpret the data to drive simulation and provide answers to complex and costly mechanical engineering challenges.

## Our Response to COVID

Given the current travel restrictions that your company is likely experiencing, we want to make aware of two ways that we can help with any required testing.

- We can perform a remote “Assisted Test”
- Our staff can travel to most destinations and perform on-site tests

Below is more information and an example of a recent Assisted Test project. Please contact us to discuss your testing requirements and how we can help.

## Assisted Testing: Holt Manufacturing Case Study

When COVID 19 put an end to travel, Holt Manufacturing was left with no way to validate a customized genset for its customer. The decision was made to augment the company's testing resources with 6D's remote testing services.

## 1 on 1 with: Chin Yu

Qingshi (Chin) Yu is a Test Engineer for 6D. His formal training at Northeast Dianli University in China was in thermo power engineering and heat transfer application. Chin also served as a lecturer at his alma matter for five years before spending nearly a decade as chief engineer at Humen Power Plant in China, where he was assigned to manage and support the LM5000 gas turbine power generators. Learn more about Chin in this interview.
