Fall 2020

ENGINEERING ANSWERS through TESTING & ANALYSIS

In this business you have to get your hands dirty. From the test lab to ocean oil platforms, underground mines, and everywhere in between - we collect, analyze and interpret the data to drive simulation and provide answers to complex and costly mechanical engineering challenges.

Statistical Visualization of Big Data

Testing your product is a big deal; whether it is the last step to validate your design, or if you are trying to solve a problem. Staging events is great for pushing the limits on your design, but the reality is that its hard to account for everything. When it comes to this, relying on field testing with customer usage is a great tool for success.

Experiences Over the Years

Travel Restrictions and Assisted Testing

Given the current travel restrictions that your company is likely experiencing, we want to make aware of two ways that we can help with any required testing.

- We can perform a remote “Assisted Test”
- Our staff can travel to most destinations and perform on-site tests

Below is more information and an example of a recent Assisted Test project. Please contact us to discuss your testing requirements and how we can help.

1 on 1 with: Josh Hardwick

Josh is experienced in instrumentation, test execution and data analysis. He is adept at performing OMSA (on-machine stress analysis) and linear vibration tests – along with data processing and analysis for the final report. Working in cooperation with customers, Josh will utilize CAD tools to design and develop fixturing used in instrumentation and data acquisition.
