ENGINEERING ANSWERS through TESTING & ANALYSIS

In this business you have to get your hands dirty. From the test lab to ocean oil platforms, underground mines, and everywhere in between - we collect, analyze and interpret the data to drive simulation and provide answers to complex and costly mechanical engineering challenges.

What's New: Wolf Star Partnership

WOLF STAR
T E C H N O L O G I E S

If you know the true loads and have a great model, you can analyze anything with confidence. Now, instead of assuming the loads we can learn what they actually are over time. This is made possible with the new partnership between 6D and Wolf Star Technologies.

Tech Tip: Weldable Strain Gages

Have you ever wanted to capture strain data in a location that is less than ideal? Maybe the location is subject to extreme

temperatures, washdown procedures, or there are just too many contaminants in the area to install a traditional strain gage. If so, weldable strain gages may be the answer for you.

In this 6D Tech Tip we share our experience with weldable strain gages. Follow the link below to read more.

Meet Our Co-Ops

Madison Detherage

Madison is a student at the University of Cincinnati. She is working toward a degree in Aerospace Engineering and computer science certification. Read more about her [here](#).

Nathan Berge

Nathan attends the University of Cincinnati where he is studying Aerospace Engineering. Nathan is in the third year of a five-year program and is set to graduate in 2026. Learn more about him [here](#).

Strain Gage Transducers

6D develops and fabricates strain gage transducers that measure vehicle suspension forces, powertrain torques, motor loads, and braking forces in the field. We also offer the production of custom bolts and shear pins for bolted joint analysis.
